

HOW TO PRINT IP CONFIGURATION REPORT ON IX3

Ensure a **blank sheet of paper** is available. Fold the sheet **in half** before printing the **IP Configuration Report**.

Note: If the paper is **not folded in half**, it may **cause a paper jam** in the **Mailing Machine**.

1. Press the **Reports** button located to the **left of the keypad** (identified by the **line graph icon**).
2. Navigate to **IP Configuration Report** and press the check mark button.

3. Run the **folded sheet of paper** through the machine once.
If the **motor continues to run**, **flip the paper over** and feed it through the machine a second time.

Note: In most cases, the report may print in two separate sections.

4. The **report** should appear as shown below.
The **Host Name** will print **first**, and when you **run the paper through a second time**, the **remaining information** will print on the opposite side.

Host Name	Nd-za1815209269
-----------	-----------------

IP Config	DHCP setting
MAC Address	00-1b-00-4b-c4-36
IP address	10.77.12.74
IP mask	255.255.255.0
Gateway IP Address	10.77.13.1
DNS IP Address 1	10.77.112.38
DNS IP Address 2	10.77.113.94
